Watch for falling trees
Trees and branches within the fire area can fall with no warning.

Consider slope stabilization
Burnt slopes are susceptible to erosion and debris flows.

Avoid down power lines
Call your local utility company.

Pay attention to weather
Listen for flash flood alerts and evacuate if necessary.

Establish evacuation routes
Identify several ways out of your area. Prepare an evacuation kit and make sure everyone in your household knows what to do in case of a flood event.

Purchase flood insurance
If you are downstream from or adjacent to the burn area, you are at risk for flooding and debris flows.

Secure outdoor furniture
Heavy furniture can move in a flood or debris flow and cause further damage.

Clear culverts/drainages
Remove any debris, lawn clippings or material blocking culverts & drainages.
